1 ABOUT THIS REPORT

BOARD STATEMENT

We are pleased to present OKH Global Ltd's inaugural annual Sustainability Report for our financial year ended 30 June 2018 ("FY2018").

The key material economic, environmental, social and governance ("EESG") factors for OKH have been identified and reviewed by the Chairman and the CEO. The board of directors of OKH ("Board") oversees the management and monitoring of these factors and takes them into consideration in the determination of the company's strategic direction and policies. Sustainability is a part of OKH's wider strategy to create long-term value for all our stakeholders.

With the availability of environment, social and governance data, sustainability reporting has gained greater significance to investors. Far from being just an image building exercise, today it is widely accepted that good ESG practices contribute to the overall long-term success of the company and play an important part in the competition for talent and investment.

Businesses must be quick to adapt to key stakeholders' concerns, closing any potential gaps and capitalizing on opportunities amid today's rapidly-changing business environment.

In defining our reporting content, we applied the Global Reporting Initiative (GRI)'s principles by considering the Group's activities, impact and substantive expectations and interests of its stakeholders. We observed a total of four principles, namely materiality, stakeholder inclusiveness, sustainability index and completeness. For reporting quality, we observed the principles of balance, comparability, accuracy, timeliness, clarity and reliability.

The ESG data and information provided have been derived from internal data monitoring and verification to ensure accuracy.

2 OKH APPROACH TO SUSTAINABILITY

SUSTAINABILITY COMMITTEE

SUSTAINABILITY METHODOLOGY

3 STAKEHOLDERS AND MATERIALITY

STAKEHOLDERS ENGAGEMENT

OKH believes that an important starting point in our sustainability journey is to identify our stakeholders and material ESG factors relevant to our business. The interests and requirements of key stakeholders are also taken into account when formulating corporate strategies on sustainability. These key stakeholders include, but are not limited to, customers, suppliers, employees, investors, and regulators. We adopt both formal and informal channels of communication to understand the needs of key stakeholders, and incorporate these into our corporate strategies to achieve mutually beneficial relationships.

Below sets out our engagement with our stakeholders:

MATERIALITY ASSESSMENT

1 IDENTIFICATION

Identification of the material factors that are of relevance to the Group's activities

2 PRIORITISATION

Prioritization of the material factors and identifies key sustainability factors to be reported upon

3 VALIDATION

Validation of the completeness of key sustainability factors identified to finalize the sustainability report content

4 REVIEW

Review focuses on the material factors in previous reporting period and also considers stakeholder's feedback, changing business landscape and emerging trends

Our sustainability process begins with the identification of the GRI relevant aspects. The GRI relevant aspects are then prioritised to identify material factors which are subject to validation. The end result of this process is a list of material factors disclosed in the sustainability report.

We conducted a materiality assessment during the year with the help of an external consultant. Going forward, materiality review will be conducted every year, incorporating inputs from the stakeholder engagements.

To determine if an aspect is material, we assessed its potential impact on the economy, environment and society and the influence on the stakeholders. Senior management took worked closely with our consultant. Aspects were identified and prioritised through internal workshops, peer reviews and social impact assessments at site level. Applying the guidance from GRI, we have identified the following material aspects:

ECONOMIC

- Economic Performance
- Anti-corruption

ENVIRONMENTAL

- Environmental Compliance

SOCIAL

- Occupational Health and Safety
- Diversity and Equal Opportunity
- Customer Privacy
- Marketing and Labelling
- Local Communities

GOVERNANCE

Before arrival of seniors, we met up with Miss Amalina for a briefing session. She provided a short introduction of Ren Ci, highlighted safety pointers for handling of the wheelchairs (fastening of seatbelt, use of wheelchair brake/lock, lifting of footrest before user getting out/in of wheelchair). When the seniors arrived, Miss Amalina conducted a demonstration on handling of wheelchair, as well as assigning volunteers to the seniors. With the help of Ren Ci staff, OKH volunteers distributed snacks and drinks to everyone.

We proceeded to the aquarium and Maritime Experiential Museum. Group photographs were taken outside aquarium. One of the star attractions of Sentosa Island, the SEA Aquarium featured a number of Zones of sizeable exhibits, displaying a wide array of aquatic life.

There were some very interesting exhibits to explore, such as the underwater glass tunnel where we were greeted by sharks swimming above our heads, the Open Ocean with the largest viewing glass window to the ocean, passing through clear floor to see baby sharks and other marine creatures swimming below our feet, and the Ocean Dome, home to gigantic sting rays gliding gracefully through the water. Some visitors even had a chance to witness a diver feeding sting rays at the Shipwreck exhibit.

After 1.5 hours of amazing experience enjoying underwater life up-close, we had come to the end of our visit. We gathered outside the aquarium for refreshments while mingling with elderly seniors and Ren Ci staff before they left Resorts World Sentosa.

We sincerely hoped this had been a worthwhile activity for elderly seniors as they broke away from the monotony of care centre daily routines while enjoying a relaxing and entertaining outdoor experience.
